Notes:

* *Thecanthes* was recently reduced from the generic level to synonymy with *Pimelea*, but was not formally designated an infrageneric rank of subgenus of section (as it once had been). Here, we tentatively designate *P. sanguinea* to “section” *Thecanthes*. Additionally, while the sectional scheme of Rye & Heads (1990) places the NZ species of *Pimelea* into sect. *Pimelea*, Burrows (2008) did not follow this treatment and offered no infrageneric alternative. Here, we tentatively follow Rye & Heads (1990).

† These taxa were pruned from the data set before all topology clustering analyses.
